

DH26PC2(H1Z)

Rotary Hammer

26mm SDS Plus

Barcode 4966376327331

NEW

3 mode action: hammer drilling, drilling only and hammering only

Compact size for improved user comfort

Variable speed

Specifications

Bit shank	SDS Plus	
Capacity	Concrete	26mm
	Steel	13mm
	Wood	32mm
Input power	830W	
No load speed	1,100 (min-1)	
Full load impact	4,300 (min-1)	
Joules	2.9j	
Weight	2.8kg	

Included accessories

Side handle
Depth gauge
Carry case

Selling Points

5% lighter than DH26PC for improved user comfort
3 modes for a range of applications
Soft grip main and side handle

Features

3 mode action: hammer drilling, drilling only and hammering only
Compact size for improved user comfort
Idle striking prevention mechanism reduces vibration and noise
Variable speed
Forward and reverse

Applications

Making holes in tile, brick and concrete for anchors, nylon and other plugs
Concrete crushing, chipping, ditching and stripping
Making holes in metal and wood materials

6 YEAR
POWER TOOLS
WARRANTY*

*6 year warranty on selected products with online registration. For details visit www.hikokipowertools.com.au

Quick Reference Guide for Rotary Hammers

Core HiKOKI Technologies

Brushless Motors:

A HiKOKI technical advancement. After pioneering the use of brushless motors in cordless tools, now we've applied their benefits to electric corded tools with astonishing results. Get your hands on a compact and lightweight range of tools with really heavy-duty power. By reducing the number of moving parts in the motor we've decreased tool size and weight but increased power output. HiKOKI brushless AC motors deliver greater durability and longer life even under heavy use. There are no carbon brushes to regularly replace and no risk of armature burnout, layer short or commutator wear.

User Vibration Protection (UVP):

Our policy is to design tools with maximum inbuilt protection against excessive vibration, whether equipping them with spring-operated dynamic vibration absorbers or building-in special, vibration-absorbing handles. Not only is UVP good for operator safety by helping to safeguard against White Knuckle Syndrome, it's good for business. After all, the higher the degree of comfort and ease of use, the more efficient an operator can be for longer.

Aluminium Housing Body (AHB):

AHB is the feature to look for when you want outstandingly robust and highly durable power tools. In effect, the motor is shielded by a double protective armour consisting of a stator holder contained within a die-cast outer aluminium housing body (AHB). This results in the durability of both the motor and the tool body being remarkably improved. AHB is only available on selected HiKOKI tools.

*5 year warranty on selected products with online registration. For details visit www.hikokipowertools.com.au
